

**piCalculator**  
Making Ogden Easy

Calculating damages  
with unrivalled speed  
and accuracy, saving  
time and money.

## The Basics

piCalculator is an online tool that assists in the performance of personal injury and clinical negligence calculations.

piCalculator provides the fastest method of performing Ogden calculations and dramatically speeds up the process of generating a schedule of loss.

Whether it's a quick calculation you need or a schedule of loss, piCalculator delivers.

## Who will benefit?

A variety of professionals use piCalculator to calculate damages, including:

- Judges
- Barristers
- Solicitors
- Legal Executives
- Paralegals
- Claims Handlers
- Law students

Our customers range from individuals to the largest of insurance litigation firms and whole chambers.

You benefit from being able to do your job more efficiently, which in turn benefits your client.

## Why should I use piCalculator?

Time is money! Lawyers in this field are under increasing pressure to deliver the same or better level of client service at a lower cost.

### Claimants

- Improves settlement figure
- Increased accuracy reduces a Defendant's ability to challenge the schedule
- Protects your position if costs are scrutinised by a cost draftsman, mediator or judge
- Limits investigation costs
- Enables more time to be spent on critical aspects of a case

### Defendants

- Enables efficient analysis of a Claimant's schedule of loss
- Identify areas of agreement and conflict quickly
- Substantial costs savings through efficiency in these tasks
- Vital to Defendant firms in maintaining client contracts

### For both parties:

- Reduces risk and margin for error
- Enables quicker settlement

"This is an essential tool for anybody doing schedules for personal injury and clinical negligence claims - even the most difficult quantum calculations are done at the click of a button."

**Adam Dawson. 9 Gough Square**

piCalculator has been designed with direct input of legal professionals to enable you to devote more of your precious time to your clients. But don't just take our word for it...

"For the busy practitioner, piCalculator is a 'must have' tool. It calculates damages claims quickly and clearly with the option of editing, saving and printing the results. There are built in links to other key sites and because piCalculator is constantly updated you can be sure of putting forward your client's best case even if the data or the case changes."

**Simon Readhead Q.C. 1 Chancery Lane**

## The Calculators

### Special Damages

- Past losses and interest

- VAT

## Other Resources

- Access to Ogden 5 and 6 tables
- A facility to search the Annual Survey of Hours and Earnings (ASHE)
- Schedule utility to raise, edit and save calculations.
- Instantly export results to Microsoft word.

## What is the impact on my IT department?

When making a decision to purchase software a key consideration, usually raised by the IT department, is additional costs over and above the purchase price to cover installation and ongoing support.

### Zero Setup Costs

Subscription to piCalculator is by way of an annual license fee. There is no large initial payment. Purchase is by credit or debit card online or by invoice for larger subscriptions. The system is automated to provide a seamless experience, yet you can simply call or email the piCalculator team if you wish to discuss any pricing or set up options.

### Zero Installation Costs

piCalculator is a web based solution so there is no need for a site visit by us to make an installation on your server or desktops.

### On Demand Solution

Users can instantly access the software via their browsers and internet connection. There is no need for phased roll-out, as is the case with many software installations.

### Zero Maintenance Costs

piCalculator is updated instantly when new source data becomes available and users are kept informed via our news page. There are no software updates or patches needed.

### Zero Support Costs

Users have access to the piCalculator team which reduces demand on our user's internal helpdesk and IT departments.

### Training

The site provides simple user guides for key functions, and each calculator provides explanatory notes at the click of a button. However, we are happy to make arrangements for training our customers so please just ask!

Calculating damages with unrivalled speed  
and accuracy, saving time and money.
